

FERENC LÉNÁRT**PERSONAL INFORMATION**

Date of birth: 23. 02. 1954., Gönc
Marital status: married, 2 children
Citizenship: Hungarian
Phone: +36 1 463-1559
E-mail: lenart.ferenc@vik.bme.hu

QUALIFICATION

1973 - 1978 Techn. Univ. of Budapest, Faculty of El. Engineering, MA in Microwave Telecomm.
1988 MSc in Electrical Engineering
1988 dr. Univ.

EXPERIENCE

1978-1980 FMV, Precision-engineering Enterprise, Antenna Development Department (microwave antennas and antenna measurements)
1981-1982 HTV, Company for Telecommunications, Antenna Development Group (SW, UHF and VHF antennas and antenna measurements)
1982- Budapest University of Technology and Economics (BME), Department of Broadband Infocommunications and Electromagnetic Theory
2000- Head of the Shielded Anechoic Antenna and EMC Laboratory
2019- pensioner

LANGUAGE SKILL

English: basic
German: beginner

RESEARCH ACTIVITY

-Design of antennas, radar antennas, broadband antennas, antenna systems, antennas for spacecraft
-RF and antenna measurements, PC-controlled measurements
-Special radar applications: tank level measurement, DTF measurement, ground surveillance radar
-RF directional finding - directional finding antenna systems, electrosmog measurements, forensic expertise
-Development and measurement of high frequency absorbers and camouflage materials, Active RF camouflage
-EMC education and extension courses
-EMC qualifying measurements, EMC design of intelligent buildings, Design and test of shielded enclosures

OTHER ACTIVITY

Professional Authorites:
-MTE Sz Association of Communication engineering 360/1994
-Ministry of Industry and Trade Wsz 98/1996
-Driving licence, cat. „B”

ASSORTED PUBLICATIONS

- F. Lénárt: The Design and Measurement of an Anechoic Chamber for Indoor Modelling of Microwave Radio Links Third Junior Scientific Conference of the TKI Research Institute 1988 (in Hungarian)
- Scultéty, Lénárt, Szűcs, Gézárt: Computer network's EMC and data protection, DEC Hungary Co. 1994
- István Balajti, Tibor Birtalan, Ferenc Lénárt: Determined possible bandwidth of large aperture VHF antenna, NATO AC323/(SETO) TG21, Conference of Corporate Body 14-16th March, 2000 Rome

- M. Borsi, D. Skriba, F. Lénárt, A. Bánfalvi, J. Szabó, Zs. Váradi: EMC Testing Approach for Power Distribution Unit of Small Satellite, ESA Workshop on Aerospace EMC in Budapest, 20 - 22 May 2019

- T. König, V. Qiao, Zs. Váradi, J. Szabó, F. Lénárt, A. Bánfalvi: EMC Aspects of the LMP Experiment
Aboard ESEO, ESA Workshop on Aerospace EMC in Budapest, 20 - 22 May 2019

MAJOR REFERENCES

- Monopulse tracking antenna for Tyros (and Meteosat) satellites (BME MHT 1978-1982)
- Development and design of short wave directional finding antenna systems (BME–HTV-Mech. Labor 1983)
- Development and measurement of high frequency absorbers and camouflage materials (BME-HTI 1988)
- EMC measurements of NASA's Dosimeter(PILLE) device (BME - KFKI – NASA 2000)
- Onboard high sensitivity ELINT reconnaissance antenna (Lénárt F. - HM TH, 2002-2004)
- EMC extension courses (ÉDÁSZ, Philips, ELCOTEQ 2000-2005)
- Data protection by active RF camouflage in govermental computer headqurters (Lénárt F. – Vilodent Bt. 2002-2005)
- Microstrip antennas for ground surveillance radar (Lénárt F. – Pro Patria Kft. 2002-2008)
- Development of 3D audio frequency magnetic field analyzer (BME 2005-2013)
- Development of UAV terrestrial and onboard antennas (BHE 2004-2016)
- Development of tank level radar antennas (Nivelco-BME 2009-2015)
- Development of a broadband (10 Hz - 6 GHz) mobile “esmog” measurement system (He-Ba Kft. – AutSoft Kft – Lénárt F. 2017-)
- EMC measurements of ESEO satellite components (BME HVT – Space Research Group 2018)
- Drone reconnaissance radar antenna development (BHE – Quini Ltd. – Lénárt F. 2018-)
- Broadband (0.03 - 6 GHz) directional antenna system development (AH – KNBSz - Relcom Kft – Lénárt F. 2018-)
- Elaboration of space engineering subject topics (BME VIK 2020)

AWARDS

- VIK Dean's Commendation 2022

Budapest, April 13, 2022
